The Senators  
Parliament House  
CANBERRA ACT 2600

RECEIVED

13 MAR 2009

Sen Hon  
ELECTOR

Dear Sir/Madam,

I am pleased to introduce myself. My name is Marcus Kuhn. I live on a property with my terrific parents. We are farmers of Murray Grey beef cattle and Multi-purpose Merino sheep for wool and meat.

I love our home which is on the upper fringe of the Liverpool Plains. It is so beautiful. Our property has ancient volcanic hills and they are what has made the plains so rich. It has taken Earth's lifetime to create. That is why we need to protect it, it can't be made by man.

I love living here and I want to farm our land after my dad. If you let the destructive mines in, they will terminate the future of my dreams and of many other young Australians. The mining companies don't care about our future, they only care about their profits. For many reasons, I think the Governments of Australia are foolish to think BHP is beneficial to our future.

If I can see it at six years of age, how is it that you, the leaders of our country, can't see it at all?

For now

Marcus
