

To whom it may concern , I have untold faith in the importance that natural therapies play in the healing and remission of cancer, to lose government support would be a great loss as I have witnessed so many amazing cures in my time of studying massage shiatsu foot reflexology anatomy physiology etc over the last ten years and I will continue to explore these subjects as learning new theories and their successes never ceases to astound me. I have not had cancer but know some all of whom have treatment by doctors then heal their burnt tissues and scarred minds through massage and following the nutrition of people as Dr. Gawler so they invariably are used together so please consider keeping natural therapies in your constitution thanking you in anticipation.
