

The purpose of this letter is to bring to your attention the success I had after undergoing **b17 treatment**. As a result, I would like to make a pleade that such a treatment be made available to cancer patients, despite the negative reputation it has received in the medical profession.

In June of 2003, I was diagnosed with a tumour of the brain stem. As a result I was unable to walk unaided, and my balance and coordination suffered greatly. I was advised by my Neurologist that radiation treatment would help me. I underwent 5 weeks of continuous treatment and didnt see much improvement during this period and well after treatment. In fact I would say my progress was going backwards because of the harsh side effects I went through. My Oncologist said that "chemotherapy" would not help my situation. I then began to research alterative natural treatments to cure cancer.

I came across **b17 treatment** (also known as Laetril). I came in contact with Dr. G. Kemp who advised me of the benefits of such a treatment. Numerous testimonials helped me to realise the healing properties of **b17**. I had no hesitation to persue such an avenue. Dr.G.Kemp wrote a letter to my oncologist stating my intention because conventional medicine i.e. chemotherapy, was deemed "inappropriate". My oncologist was so opposed to this letter, that he now claimed "chemotherapy" can help my situation. It was my choice to undergo the **b17 treatment**.

In February of 2004 I began **b17 treatment**. I followed Dr. Binsel's (a retired American Cancer Doctor) diet that works inconjunction with **b17 treatment**. The treatment was fast, simple, painless and most importantly was free of the nasty side effects that radiation treatment brought on. In a matter of weeks, I saw my energy levels dramatically increase and my symptoms begin to go away, something that radiation treatment failed to do. As the months went by people were astounded by the rapid progress I was making. One year later, my MRI scan is **clear** so I give much praise to this **b17 treatment**, and to Dr. G. Kemp for directing me to this harmless, natural treatment. Im am now back working full time, attending gym, driving and doing the things I was doing prior to being diagnosed with this illness.

I hope this testimonial will help make **b17 treatment** available to people with cancer. It should be a patients choice, not a oncologist's choice.

Regards,

Jarrood Lourensz
