

Dear Sir /Madam,

I discovered today that an amendment bill will be discussed and possibly approved tomorrow 12th oct which may impact on a woman's right to a medicare funded abortion.

I am 53 years old and have had three children-all healthy. The right to an abortion in a first world wealthy country such as Australia should be seen as a standard right. Not subject to change on the whim of Mr Abbott or the clergy.

I strongly urge this matter be given the due consideration it deserves. The amendment must be stopped tomorrow and the public made aware of the senate's intentions.

Thanking you,

Patricia Mann.
