Dear Committee Members

- On behalf of our 8000 State Members of Catholic Women's League. I am expressing support for a Continuing Total Ban on Human Cloning.
 - I oppose the recommendations of the Lockshord Committee to allow therapeutic cloning of human embryos.
 - I oppose greater access by scientists to human embryos for stem cell research.
 - Cloning human beings is grossly unethical.
 - Embryos for research purpose is never therapeutic, there is a deceptive misuse of this word "Therapeutic Cloning".
 - The Australian Health Ethics Committee, described it as lacking transparency & concealing the truth
 - This cloning treats human life as manufactured product.
 - For the future generations of this Nation, please understand what you are doing.
 - I support adult stem cell Blom cord, already providing cures & treatments
- Yours Sincerely, Mary Harrold.
