

Senate Community Affairs Committee,

As another of the masses of concerned Australians, please, please ensure the continued government support and hopefully expansion of the "Opal" fuel program.

As we try to grow the somewhat conservative effort to alleviate the suffering of our indigenous people, we need them to be in a state to at least attempt to engage in the programs that are available. It's one thing for some people to suggest that we need to provide opportunities first, to try to get people to motivate themselves to break away from the cycle of substance abuse, but the reality is we need to reduce the availability of substances that are doing such a vast amount of damage before we can even begin to do so.

I am another of those who are begging for the government to support and subsidize the "Opal" fuel program.

Kind Regards,

Angus Borowski
