Dear Senators

Anecdotal evidence that abortion clinics and abortionists do not warn women of the dangers of having abortions or the alternatives to having an abortion is abundant.

In some cases litigation is being undertaken by women who are having side effects of abortions that they were not warned about and some large payouts are being awarded.

I therefore recommend that all abortion clinics should be required to fully inform mothers of the dangers of having an abortion and the alternatives to killing unborn Australians.

Finally, this is an important issue to me. I will be taking note of the speeches and votes of my elected representatives on this issue then considering this when I vote in the election due in 2007.

Sincerely

Kenneth Ian Glasgow
