

Hello,

I support the Food Standards Amendment (Truth in Labelling – Palm Oil) Bill 2009.

There must be mandatory labeling of palm oil so I can make informed choices about what products I buy. It is terrible that Australians are furthering the destruction of habitats and we don't have the choice to stop it. I don't want to take part in this anymore and I should be given a way to stop buying palm oil so that industry can use more sustainable oils in their products.

I am not available to appear to give evidence before a Senate Committee hearing in Canberra.
