

Sir, Madam

I am writing a submission of support to the amendment to the Food Standards bill (Truth in Labelling - Palm Oil).

I strongly believe that I have the right as a consumer to be aware if a product contains Palm Oil, a product that has such a detrimental affect on the environment. I do not want to be associated with any company that contributes to the eratication of any species on this planet, and any company that purchases non- sustainable palm oil is doing exactly that to Orangatans.

Australians have the right to make an informed decision about the products we buy and the government has a responsibility to provide the legislation that enforces companies to give us all the information we need to make that decision.

Thankyou
Allanna McBay
