

To the person responsible,

Please legislate to clearly label palm oil on all food products – all ingredients & the country of manufacture of all products should appear clearly

(E.g. in red & boxed in the same area on all items) so as a consumer you can easily find and understand the information so that you can make ethical choices when purchasing

Many consumers do not support products that destroy animal habitat, native habitat or don't pay or treat their workers fairly

Please make labelling clearer so that all consumers can make a choice

Thank-you Helen Altmajer
