

Products containing palm oil need to be correctly labelled stating that they contain palm oil. The Food Standards Amendment states that all products must truthfully state what they contain.

HOWEVER this is not being done with products containing palm oil. I demand that if a product contains palm oil that it truthfully say so on the packaging.

I refuse to buy anything containing palm oil due to the effects palm oil plantations have on not only animals yet on the native people.

I know i am one off MANY, MANY people who want to the truth of what is in products to be put forward.

I will continue to tell many of what this and will not stop until products containing palm oil are correctly labelled.

ANY PRODUCT CONTAINING PALM OIL NEEDS TO CORRECTLY STATE THIS ON THE PACKAGING!

Regards
Steven Benbrook
