

Name: Jennifer Nguyen

I am aware that our food product, "Frozen dinner" and fast food might contains Palm oil. I am very concerned about the using of palm oil because they effected on environment. Palm oil as a biodiesel fuel had gained popularity in recent years due to high productivity and low cost. Also palm oil is very important to livelihood of million people in Indonesian. That's why people keep expanding and didn't know when it's produced Non-sustainably, thousand of orangutans have to cutting off rainforest and uncontrolled burns. They are destroying the orangutan's natural habitat. I feel so sorry and wrong with all the orangutans. I love to learn more about their life and take some actions to protect them.
