

My name is Katie Foxley-Conolly and I am writing concerning the Food Standards Admendment(truth in labelling palm oil) Bill 2009.

I strongly believe that as a free country we should have the right of freedom to choose whether or not we want to purchase palm oil products. I am very much against palm oil and it really upsets and frustrates me that i could be buying palm oil and therefore supporting it without even knowing. If this is the case I certainly would not buy it by choice and i know many people feel the same way.

I do not wish to appear before a senate committee hearing in Canberra.

My contact details are
