

I would like to express my support for the Private Members bill in the Australian Senate calling for the mandatory labelling of palm oil. I am a conscious consumer who makes food purchases with thought and consideration. I buy Australian products and organic products and always want to know what is in what I eat and also what products I use on my body and use in my household. While I like to support Australian products I also understand that I am a member of a whole world and do what I can by using green power and recycling. The animals of this world deserve their place. I believe that each person has to make choices according to their own ethics and morals. I cannot do this if all ingredients are not named correctly on food products.

Yours sincerely

*Donna Starr*
