

Bill : Food Standards Amendment (Truth in Labelling Palm Oil) Bill 2009

I was totally unaware that palm oil was having such a huge negative effect globally. To be honest I never really knew what vegetable oil really was, I just assumed it to be olive or sunflower. Now that I know, I need to make a positive change to world by choosing products that dont contain palm oil..... the problem is, I cant because palm oil is not listed separately.

**I totally support mandatory labelling of palm oil and think it necessary for every product that is sold in Australia.
My contact information is as follows;**

Jermaine Madam

I would like this email to appear as evidence before the Senate Committee Hearing in Canberra

Thankyou

Jermaine
