

To Whom it May Concern

I am writing to in regards to the Food Standards Amendment (Truth in Labelling – Palm Oil) Bill 2009.

My interest in support of the above mentioned Bill is on personal grounds.

Not only am I concerned about the environment within Australia but I am also concerned about the environment around the world. I am only one person but I would like to have the choice to choose the products I buy and to know exactly what is in them.

I believe the above Bill should be passed so people can make informed choices and decide whether or not the support the production of palm oil. I for one won't be purchasing palm oil products.

Regards

Emma O'Brien
