

On behalf of our family of four, we would be so impressed that the Australian Government and FSANZ process this bill.

Adding two words "Palm Oil" to ingredients listing is simple and will make a big difference to our household choices at the supermarket.

PLEASE, show that FSANZ holds weight in your industry and not just seen as a corporate puppet. Without you, we would still be blissfully ignorant as to ingredient listings and the impact on our personal AND Global health.

With respect,

Kerry, Grant, Jordan and Callum Williams
