

To whom it may concern ,

I am compelled to write this letter in regard to the use of palm oil and its effects on the Orangutan. I would really like to see ( truth in labelling - Palm oil bill 2009 issue to be addressed .

As a civilised country we should not be supporting the destruction of rainforest and the possible extinction of an entire species I voted for action in the environmental issues and currently I don't see us doing a lot for example the whaling issues we did nothing to stop them this year at all and now we have the poor orangutan can't we do anything are we a powerless country or are we going to continue to let the rest of the world treat us with total disrespect a classic example of the great barrier reef Come on Australia lets stand up for what we all know is right protect what is ours close to home re whaled and the reef and don't allow other countries to send us products that directly support the destruction of forest and extinction of species

Please do something

Respectfully Rhonda
