

Dear Sir/Madam,

I am writing this submission to support the above proposed Bill. I have been concerned in the difficulty in identifying Palm Oil in products for sometime now and I feel it is well overdue that people should be able to easily identify Palm Oil in foods and products.

The deforestation in countries that grow this product is shameful, the loss of habitat to Orangutans and other animals needs to be given priority over the senseless need of this unhealthy and unsustainable oil. Our consumer choices should include identifying whether we are contributing to this.

Regards,

Katherine Pearce
