

On behalf of all staff and volunteers at Symbio Wildlife Park we would like to ask you to label Palm Oil in Food as part of the Food Standards Amendment (Truth in Labelling – Palm Oil) Bill 2009. At Symbio we aim to educate people to inspire them to contribute to conservation. By labelling palm oil we can encourage people to avoid products that are destroying flagship species such as the tiger and orangutans. This has a flow on effect to preserving whole ecosystems. People cannot make informed choices if food is not labelled correctly.
