

Hi,

It is important to me that I know what is in the foods that I give to my family. I am also concerned about the loss of significant species from the world. For these reasons I am concerned with the covert use of palm oil in food products and would like to be able to make a choice to select against products that contain this material.

Food standards require the labeling of specified ingredients that may have some impact on our health and well being.

I would like to see Palm Oil as one of those ingredients that requires such labeling.

Kind Regards

Tim Grigg
