

I support the mandatory labelling of palm oil on food and other products. This is because if it is not labelled people do not have a choice whether they further endanger the lives of the already endangered orang-utan. Palm oil is sourced from these creatures' natural habitats. People who would like to make a change and help this species can't do so because they do not know whether they are buying a product which has palm oil. Every other ingredient is labelled, it would seem ridiculous not to label palm oil, and there is no good reason not to. Whereas there are many reasons it should be labelled.

Regards Fay Goodall
