

To Whom it May Concern,

I would like to express my support for the palm labelling bill.

This is a major ethical problem we are facing. As consumer we have a right to choose what products we purchase.

The deforestation and massive loss of orangutan life has to stop. It was reported by Melbourne zoo that up to 50 Orangutans die each week.

These precious creatures share 97% of our DNA. Please allow consumers the right to choose ethical products.

We need to do something NOW!!!

Regards

Nicole Collins
