

Dear Sir/Madam

I write as an Australian citizen to confirm my support for the mandatory labelling of palm oil in Australian products & hence this bill.

To me, market solutions are economically sensible solutions for many of our world's problems. However, markets don't function without good information flows & so mandating the provision of relevant & accurate information is important.

I understand that Palm Oil plantations are a key problem in the destruction of orang utan habitat. Along with many others, I want the ability to choose products that don't contribute to this problem. Hence I support the mandatory labeling of palm oil in products.

Sincerely,

Linton

Linton Parker
