

I am writing to be included as a submission regarding funding or indemnity for homebirth midwives.

My main concern is for the rights of women which are being denied in this proposed bill.

If this were passed as a consumer I would still birth at home, by myself if need be as I believe that hospital based care is inferior to that offered by independent midwives or worse case scenario, the experience I might have birthing alone.

I am angry about the betrayal of women all over Australia by our government and feel as though this needs to be stopped IMMEDIATELY and action is urgent.

Thank you
