

Dear Senator Moore

Re: Inquiry into Health Legislation Amendment (Midwives and Nurse Practitioners) Bill 2009 and two related Bills

I write to express my concern about the above bills. I understand that these bills will enable Medicare funding, access to the Pharmaceutical Benefits Scheme and professional indemnity premium support for midwives providing care for women to give birth in hospital.

Medicare funding for midwifery care is long overdue. It is not acceptable however to exclude homebirth from this funding and indemnity arrangement. By doing this Australia is totally out of step with nations such as the United Kingdom, Canada, The Netherlands and New Zealand.

These nations support the rights of women to choose homebirth and fund a registered midwife through their national health scheme. In New Zealand and the U.K women have a legislative right to choose homebirth.

The intersection of this legislation with the national registration and accreditation of health professionals will prevent homebirth midwives from registering. I believe this to be an unintended consequence and ask that you take steps to include homebirth within the Health Legislation Amendment (Midwives and Nurse Practitioners) and related Bills.

I support a system where all consumers are treated equally, with the same access to funding and the same insurance protection.

I am an Australian citizen living in Germany and intending to return home in October this year with my German husband. We chose Australia as the place to start and bring up a family partly because of the healthcare related and social freedoms this country offers - homebirth is one of these freedoms that is extremely important to us. I ask that you consider the effects the above mentioned legislation will have on the lives of many mothers, families and children if it is not ammended.

Yours sincerely

Nicolette Ghazarian
