

To whom it may concern,

I am writing to express my concerns regarding the draft Health Practitioner Regulation Law 2009. I am referring to part 7, division 6, section 101 Conditions of registration.

My major concerns of this draft relate to the reduction of women's birth choices and thus the increased possibility of women birthing at home without the professional support of a qualified midwife.

I would like to see medicare change to include woman to labour and birth at home and the removal of requirement for professional indemnity insurance and penalties of unprofessional conduct.

Thankyou for your time,

Megan Benne
