

## **Re: PENSION SUBMISSION**

*These days we pensioners are really hand to mouth. It is very difficult to live a decent life any more. The prices of all the things which we buy and consume have gone sky high. Things are really unaffordable and we are living in a sad world. Please increase our pensions*

*A The pensions have not been increased for a long time. All the other things have become very expensive and unaffordable. The workers have received tax cuts, annual increments and cost of living adjustments. We pensioners have got nothing hence left behind.*

*B Oil has become very expensive these days as a result the house hold items have gone through the roof. Things like bread, eggs, milk, rice, flour, cooking oil etc are so costly that they are very difficult to buy. The dollar has become power less. We have become beggars in our own homes and the country. Therefore our pensions should be increased so that we too can afford the basic items in our every day life.*

*C The politicians have once more scored a salary rise for them selves. The most venerable lot the pensioners are left dangling in the air struggling to make their ends meet. The rich are getting richer. Not fair at all, please pull these pensioners out of the sinking ship by giving a decent rise in their pensions. I am sure you would like to see them live and walk on the road as you. Please give them a rise in their pensions.*

**Now it has been proved that there is a need for the pensions to be increased. Please oblige.**
