Subject: Submissions on Forgotten Australians

I would like to add my submission to your collection, with the view for them to be implemented please.

All the abused surviving orphans who applied for the Redressed Scheme, immediately without Parliamentary interference, unconditionally put on a pension with dignitary, honor and with rights, similar to war veterans at age 55.

It was evil and barbaric what orphans experienced, thousands died from government drug experientants in Mental Hospitals, many took their own lives, the others just survivors.

Thanks

Mrs. Waite

Dear Sir,

I would like to add to my other email I sent you in regards to orphan or children in care these days.

There should be no drugging children by Psychiatrists, as you can't heal a broken heart with drugs, only love can break a heart and only love can mend it again.

Yours Sincerely

Mrs. Waite
