

Submission to:  
The Chair  
Senate Select Committee on Climate Policy  
5<sup>th</sup> April, 2009

Dear Sir

I note the terms of reference for the Enquiry you are conducting. Notwithstanding these, I believe it would weaken the findings of this Enquiry if you did not examine the underlying assumption of human induced climate change, if only in an overview and therefore assume you will be doing so.

With this in mind I would recommend that you view the video of a lecture by Prof. Bob Carter, James Cook University titled "An Analysis of Climate Change". I have read widely on this subject and the wide range of analysis, views and findings and if I had to select only one analysis it would be this address by Prof. Carter. It is readily available on the internet, reference "Professor Bob Carter"
