

To all Labour Members of the National Parliament

I earnestly request the following changes to the current policy to secure a safe future for all of humanity.

- 1.Reduce Australia's greenhouse pollution 50% by 2020 (on1990 levels).
- 2.Recognise and respond to the steady stream of scientific fact showing the rapid rate of accelerating climate change.
- 3.Support the creation of international agreements.
- 4.Redesign the CPRS SO THAT IT DOES NOT OVER-COMPENSATE POLLUTERS.
- 5.Set a strong target with a well-designed scheme to ensure Australia does its fair share to avoid dangerous climate change.
- 5.Refocus our economy to develop sustainable industries.
- 6.Incorporate Biodynamic Agriculture into our national policy to create healthy soils thereby supporting a sustainable animal and human health and increasing carbon absorption.
- 7.Remove the concept of a floor from the CPRS

Yours sincerely,

R.I.Buchan-Hepburn.

.
