

Forget the fancy jargon. I'll come directly to the point that I voted for the ALP because I was disappointed with the Howard government and because I believed Rudd's promises of a more honest and open government in the interests of the people. Instead you are the most dishonest government in my 71 years. You are more extreme in acting against the national interest and in the interests of vested interests, particularly coal. You will either massively lift performance or you will have to be dumped.

Name: JOHN ENGELMANN
