Subject: franchising at the crossroads?

Congratulations to Mr Don Randall on his motion re franchising.

For too long the Franchisors have been ignoring the business people struggling to make a living.

I agree we should have a suitable independent body to assist in claims/ grievances etc.

I have seen many unsuitable franchisees "sold" on a business then give no or insufficient training and eventually suffer the embarrassment of "business failure" under a system that should be designed to support and grow small business.

Mr Randall and others I take my hat off to you. Please keep me informed.
