

Dear members of the Senate Environment Committee,

Mr. Fell MdB , member of German Parliament and one of the authors of the German renewable energy act (EEG) was very pleased to learn, that your honourable parliament discusses about the introduction of an Australian feed-in law.

Mr. Fell takes the liberty to send you some background information about the German renewable energy act. He hopes it might be of some use for you. Mr. Fell also wants to inform you that the European Commission did find out officially that feed in laws are most effective and most efficient in comparison to other renewable support systems.

In the annex you find the latest English papers about the very successful German feed-in law/renewable energy act

Please let us know in case you have some inquiries.

Sincerely

By order

Carsten Pfeiffer

(assistant to Hans-Josef Fell MdB,)
