

\$8000 Government Rebate available for Grid Connect Home Solar Systems

14 August 2008

Email:eca.sen@aph.gov.au

Dear Senators,

It is reassuring to learn that you are conducting the enquiry into a Renewable Energy Feed in Tariff. This is an industry ready to grow.

Senate enquiries have led to other industries growing in Australia by way of capital and labour investment by those in the industry once given a direction and leadership by the Senate Committees of Australia.

We hope your enquiry will result in direction and leadership and where appropriate incentives to expand the industry with nil or minimal government interference and the direction is set.

Queensland politicians without any research or industry discussion have set the industry back, solely because of the government's (not parliament) media tart mania.

Our Federal Senators traditionally have been removed from the media, and consequently tend to act more nationally dare I say it and sometimes put the welfare of the nation and its people (the hapless voters) ahead of re-election objectives.

So senators, you have the industry's future in your hands, and no doubt your hands are being bruised by the filthy coal burning lobby, so hopefully you will realise what is obvious, solar is non polluting.

Kind regards

Ian Hall
