

To the Senate Committee,

I am very concerned about the premature sexualisation of children under the age of 14.

I believe that children should never be portrayed sexually, either as individuals or through any form of marketing or merchandise.

I ask that you establish funded tools and infrastructures so that our governments and community leaders can better equip parents and carers so that we are all able to better and fully educate children that Adult sex is a normal part of life, and that differing Adult sexualities exist.

I do NOT believe in any form of censorship regarding Adult sexuality, including the public display of marketing materials and merchandise, and the availability of sealed pornography.

I am open to the government establishing a single entry public complaints system around this issue.

Yours sincerely,  
Lee Matthews
