

Hi,

Whenever a bill comes before you please think, "What affect will this have on some child's right to a happy healthy family life?"

Adults must be willing to give up rights individually and collectively for the sake of children. Please think of this when considering laws regarding pornography, television, the internet, gambling, alcohol, divorce etc.

If the advancement of society was to be measured by how happy the children are ours would certainly be regarded as one which is going backwards.

Yours,  
Bradley Hooper
