

Dear Senate Environment, Communications and the Arts Committee:

I am very glad that you are conducting an inquiry into the sexualisation of children.

Together with many others I abhor the sexualisation of children and I urge you to use every method to prevent or eliminate this recent evil phenomenon. For the last seven years of my retirement I have had the privilege and joy of teaching primary school children the Christian faith, as a volunteer. I have a particular delight in noting childhood innocence in sexual matters. This attitude should clearly be encouraged not debased

I wish you well in your research & consequent action.

Faithfully yours,
Spero Katos
