

Dear Sir,

I'm sending you this letter as a response to the new legislation in the renewable energy sector.

We are absolutely devastated with introduction of "Means Test" for Photovoltaic Solar Systems.

We loose customers, customers are confused why they are discriminated, they feel hurt.

There is a big anger in the community against this Government, who seems **has no idea** how to handle the issue of sustainability and global warming !

With regards,
Robert Kovac
Project Engineer
