

Further to a response from Senator Simon Birmingham

This email is to show my concern of the dramatic disinterest from the general public in the over \$100K [GROSS] income bracket cap placed on us in the last budget. There is 8000 dollars difference between an installed solar hot water heater [THERMAL]& the installation of a 1K.W Solar [P.V.ELECTRIC] system.

Please ensure your people know the difference as you seem to have linked the two together .As an electrical contractor having carried out all the accreditations necessary both from a business & moral aspect i would appreciate the opportunity to attend any meetings your enquiry has in the S.E. QLD. AREA

Yours Sincerely
Gary Holt
