

Save Our Solar (Solar Rebate Protection) Bill 2008

**Dear Committee Secretary,
Hi,**

Thank you for the opportunity to provide a submission to the Inquiry into Save Our Solar (Solar Rebate Protection) Bill 2008 [No. 2].

I truly don't see the point in discouraging higher earners from buying Solar electric grid systems, the aim is surely to keep coal in the ground, whoever does it.

I would like to add my support to removing the means test.

It is also disappointing that the scheme does not cover small wind generators, - in a good site wind can be much more cost effective.

Regards,

Geoff Thomas.

Advanced Wind Technologies.
