

To Whom It May Concern

I feel it is very **wrong** for the Federal Government to change the rebate system and not retain eligibility as it has been. This industry could be a god send initiating new experimentation in the solar industries, perhaps leading the world with breaking technologies.

Even without this, it just makes good sense in this day and age....a **win** for the environment, a **win** for the hip pocket, a **win** for creating interesting employment, a **win** for future generations.

Please listen to Senator Bob Brown on this matter.

Diana Nunn
