Subject: ABC board

we , are family , feel very strongly that there is enough very competent people normal everyday people in this country that they should be the one to represent as all , rather than personalities involve in either side of politque . The board represent as the people of this country for which every program should be cater for , they should also report to us (that is the board role). This would assure a very well balance vue and maintain the democratic attitude of this very essential broadcast for this nation.
