Subject: abc

to all it may concern

i, along with many other australians, enjoy the abc especially because it is free from the boring commercial world everyone else seems to be preoccupied with. i value that it doesn't need to rely on getting money from vested interests of the economic market. the changes made recently to the board and staff have affected the quality and style of programming i have come to enjoy reliably. as if the funding cuts alone weren't bad enough!

please leave the abc to its core competence without interfering for your own benefit. is nothing safe anymore from greedy self interest? we are humans you know, it's so obvious what you do and it breeds no confidence in your systems and behaviour. for the sake of the people, the voters, the intelligent minds left in this pathetic society structure that is increasingly hard to have pride in, restore the abc to its former operations and butt out!

concerned and aggrivated.
