

# South East Coastal

- Neil Wandel representing SEC
- SEC are supportive of a drainage board representative of the Wheatbelt and catchment stakeholders.
- SEC believe that investigations justify full-scale engineering projects to be funded through the NAP without delay.

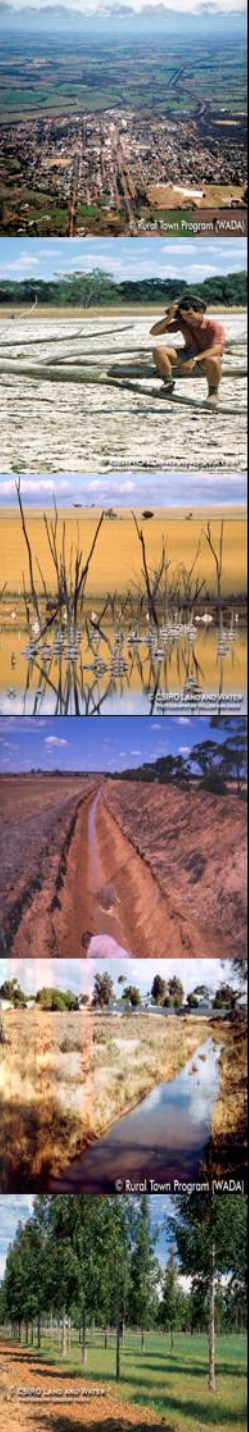

# Yarra Yarra Governance Objectives

The Yarra Yarra Group aim to use the Yarra Yarra Sub Regional boundary to create a sub regional Land conservation District

The forming of this LCD will also identify a regional boundary for the Shires within the Catchment to establish a Regional Council of Local Governments or “ROC”.

The specific purpose of the ROC is protecting and managing the Natural resources in the catchment basin.

# Governance Case Study

- During 2003 a drainage reform group was established to deliver a white paper to the Cabinet Standing Committee on salinity and NRM.
- The Yarra Yarra Catchment Group was used as a **case study** in the development of this paper, mainly to ascertain if the concept of using existing legislation to create catchment management boards had any credibility.
- The findings conceded that the appointing of Regional Organisations of Councils as catchment managers could be one way to address catchment governance.

# Using Catchment Features to Define Management Areas
