Re: Our complex and demanding TAX system.

Where does money come from? Who makes the money? Don't you know? Why don't you know? Were you never told that in school? Could it be that you are not meant to know? If not, why not? Who doesn't want you to know? Why don't they want us to know? Who does know where money comes from? Maybe a bank manager would know. No, most bank managers wouldn't have a clue.

All these questions should be asked and answered before a solution to the tax question is considered.

I could go on about this subject, but what I want to get down to is, this:
It is not the government that creates money. It's the banks!!
The Banks create money out of thin air! The Government should be the sole creator of money. If it was, we would not have to pay income tax! Income tax is entirely unnecessary! We have been conned by politicians, bureaucrats, and the media, all of whom are under the ultimate control of the banks, into believing that income tax is necessary to pay for hospitals, schools, roads, etc., and that everyone has a "moral" obligation to pay their fair share, and those who don't are evil "tax cheats", etc. That is absolute rubbish, the confidence trick of the century!

Our taxes do not go to build hospitals and schools and roads. Our taxes go to pay interest (profit) to banks that lend the money to the government to build hospitals, schools and roads.

Today In Australia, as in most other modern economies, all money is a DEBT of the banking system.

As Henry Ford said; "It is well enough that the people of the nation do not understand our banking and monetary system. For if they did, I believe there would be a revolution before tomorrow morning."

Is that why they need to unarm us the people so we can't rise up against the powerful government?!?

"Whoever controls the money in any country is the master of all its legislation and commerce." (US President James Garfield)

Now, we probably can't do much about the banks. They are too powerful and dangerous as they are owned by the same blood family, all of them.

But we have voted in our government to make our life easier. It is us they work for and they are not there to behave like they are now some kind of tyranny

creating scare tactics amongst the people who struggle every day to make ends meet. People who live here in Australia want to be happy and have a prosperous life. Only then, can the whole country survive with no crime, suicide, etc.

The answer to the tax problem is: DEBIT TAX, DEBIT TAX, DEBIT TAX. Have I said it enough times... Not only is it the fairest system we can use, but it is an honest one because it doesn't matter if you are a pensioner or a billionaire doing thousands of transaction a day; everyone will pay the same percentage from all transactions. A normal poor person will maybe only make one transaction a day and pay the 1% of that transaction. That is nothing!!!

MOREOVER, OUR GOVERNMENT WILL RECEIVE MORE MONEY WITH A DEBIT TAX THAN THEY COULD EVER HOPE TO GET TODAY (EVEN WITH, GOVERNMENT SLAVE TAX = GST) AND THE BUREAUCRATICALLY CRAZY SYTEM OF TODAY'S TAX SYSTEM WOULD BE TOTALLY UNNECESSARY.

That is to say the mass of people who work for the government as tax collectors and tax related public servants will not be needed and this will save an enormous amount of money. These unproductive members of our society who work in these situations and are fed money by the people of this country are in my opinion equivalent to thieves stealing from those who are doing productive work.

More and more are on dole, what does that do? It means we need to get in more tax to pay all these people.....from us the few that are producing real income.

A previous leader of the Labor Party said, when he was asked about the Debit tax, that it would work but it is too complicated for the normal Australian.

BULLSHIT! He just wanted power over the people. Nothing can be as simple as a Debit Tax. It makes me so angry... we are paying politicians wages and they is supposed to look after our finances and our interests, but it appears that probably they have no idea what they are doing at times and certainly most have no idea about who creates the money...so pathetic, I can almost vomit!

There are so many people out here who are screaming for the introduction of the Debit Tax. How do we make our politicians do what we want them to do? How stupid can they be?

I'm trying out here in the real world, and I hope they are for once going to listen to the people, because if they don't then the people will eventually get to the stage when they have had enough and will enforce a totally new system.

A concerned Australian citizen
