

We are extremely concerned that foreign State owned entities may be allowed to take significant or potentially controlling interests in major Australian companies, particularly mining companies.

My grandfather and tens of thousands of other Australians fought and died to protect Australia from foreign takeover, so to let Foreign Government controlled companies take over major parts of Australia's mineral wealth and thus control of our children and their children's future is tantamount to economic treason by those responsible for granting any such approval.

We implore the Australian Government to prevent any such investment in the ownership of Australian mining resources.

Brian & Linda Hall.
