Subject: 23.E.151 Delay of RET

Dear Mr. John Hawkins,

With regard to the above subject I wish to advise of the adverse impact delaying the RET has on our business due to lack of certainty for planing ahead and its immediate negative effect on workload and turnover. It was anticipated to extend our business and provide additional employment for admin and installation personelle. This had to be put on hold. We urge you to do whatever possible to have the RET legislation be passed urgently in the next sitting.

We propose two amendments:

1. Recycling the phantom RECs created through the Solar Credit scheme
2. Increasing the cap size for Solar PV from 1.5kWp to 10kW

May we suggest that the best way forward, however, would be the introduction of a gross national feed-in tariff.

--

Regards,

Ekkehard Groskreutz
