Subject:solar energy

I want it but cannot afford it. I expect the Govt to be able to put in place some kind of assistance/support for low incomes to be able to have solar and help clean up the planet...also...to solve power provider problems where they keep hiking prices and blame everything they can on the need to increae...whiule ppl are left struggleing and doing without heat,..without showers/washing/cooking etc etc ...

**SOLVE THIS PROBLEM.**

**DO SOMETHING ABOUT IT.**

Let us be able to install wind or solar power to our homes ...such as is suited to the areas we live in to save any other means of pollution ..and keep hoiuseholds free of price hikes and hardships and all out power knowck outs in bad weather...**DO SOMETHING POSITIVE** for the people and the country..**HELP US NOW.** and thank you for remembering **THE PEOPLE!!!!**

yours sincerely..

A Van Maanen
