Subject: solar power

Solar power.

The Senator, Dear sir, a clear cut subsidised policy for solar power for all Australians is required to lift the economy&help control global warming.,not grant money to be used to pay window cleaners at schools& deceased pensioners. Come on how long do you think you can fool the populace with propaganda& spin. At the moment at least 68%of Australians are being duped by the greatest fraudster in the history of Australians politics."I forgot my hair drier" WHAT A WOOS.
Please stop stuffing around & do something for your country.

regards, Ern McAllister
